

# HP 3PAR Storage Arrays

## Post Warranty Support

Sherlock Services offers Post Warranty Support for hardware break/fix and software phone assistance. We recognize that you have made a huge investment in enterprise storage and didn't intend on sweeping it off the floor for new equipment after the manufacturer's warranty runs out. Sherlock Services offers a wide range of support contracts to fit your needs and budget.

We provide support for the following models:

### Legacy 3PAR

- InServ E200
- InServ S200
- InServ S400
- InServ S800

### HP 3PAR

- InServ F200
- InServ F400
- InServ T400
- InServ T800

### New HP 3PAR

- StoreServ 7200
- StoreServ 7240
- StoreServ 7400
- StoreServ 7440
- P10000 V400
- P10000 V800

## Sherlock Services

Over 25 years of experience and dedication supporting multi-vendor environments

Sherlock Services is one of the premier post warranty providers of hardware and software support for HP, 3PAR, Hitachi, Compellent, IBM, LSI, Dell, Sun, EMC and various other products. The Sherlock Services Mission is to maintain our customer's infrastructure so that they can operate 24x7x365 without interruption to their business.

Sherlock Services offers support contracts that vary from 5 day - 8am-5pm next day response to 24x7 - 4 hour response depending on your needs. With local parts and technicians, we are able to solve hardware failures quickly and cost effectively. With our Proactive Health Check Assessment, we discover potential problems in advance to avoid possible future downtime. Our support technicians are fully certified and are capable of performing assessments, installation, maintenance, and administration of all systems, storage, printers and peripherals.

Rest assured that your 3PAR storage array is monitored 24x7x365 via our PASS (Pro-Active Seamless Support) monitoring tool. PASS is a full-featured, automated solution for monitoring your storage array. It is easy to install and setup, and it works in the background. PASS consistently monitors your environment for any changes that may constitute an issue with the equipment's functionality. Once triggered, it opens a service ticket and sends error reports to knowledgeable personnel who can then troubleshoot and resolve the issue proactively before it becomes a problem or an interruption to your business.
