

Relocation Services

Let Sherlock Services help you design an action plan to minimize downtime, control spending, reduce liability, and provide a smooth transition. With years of experience in moving equipment, we are capable of moving a single system or a whole computer room. Whether it is between buildings on the same campus or across the country, we can get the job done.

Sherlock Services

Since 1991 providing experience and dedication supporting multi-vendor environments

Sherlock Services is one of the premier post warranty providers of hardware and software support for HP, 3PAR, Hitachi, Compellent, IBM, LSI, Dell, Sun, EMC and various other products. The Sherlock Services Mission is to maintain our customer's infrastructure so that they can operate 24x7x365 without interruption to their business.

Sherlock Services offers support contracts that vary from 5 day - 8am-5pm next day response to 24x7 - 4 hour response depending on your needs. With local parts and technicians, we are able to solve hardware failures quickly and cost effectively. With our Proactive Health Check Assessment, we discover potential problems in advance to avoid possible future downtime. Our support technicians are fully certified and are capable of performing assessments, installation, maintenance, and administration of all systems, storage, printers and peripherals.

Physical Migration

Your equipment is too critical to your organization's success to leave in the hands of inexperienced movers. We'll help you plan, provide de-racking services, pack, move every device using our state of the art moving strategies, supplies and trucks and perform all re-racking services. With many years of experience transporting high-value materials, you can be sure that every device will arrive in the condition before it left.

Project Planning and Management

Sherlock Services has a proven methodology to ensure everything has been given careful consideration. Even the simplest of steps missed can lead to catastrophe. Moving equipment is no easy task. It requires careful planning and a proven process. Let our knowledge of planning major data moves protect your organization and keep you up and running throughout the project life cycle. Our experienced project managers, move techs and drivers will walk you through every step to ensure your team understands our process and more importantly we understand your requirements.

On the side of caution

Don't allow just any company to take your environment down. Trust Sherlock Services to understand your equipment and ensure that it is fully functional prior to potential moving issues. We always recommend to backup your environment prior to any move, and power down all equipment and power up at a minimum of one week prior to the move to allow our engineers to repair parts that fail due to years of use and stress. These simple steps ensure a successful relocation of your equipment with minimal impact to your business.

Disclaimer: If your equipment is under a support contract with Sherlock Services and you decide to utilize another moving company, it is that company's responsibility to ensure that all equipment function as it did prior to any move. Sherlock Services will upon request assist with damages on a time and material basis.
